Good afternoon,

The Pre-RD has just retrieved the last sample for the day, SMB-110 (near RM 15). After approximately 20 min of unsuccessful attempts, the boat drifted a few hundred feet SE of the target location. After 2 min of fishing, the fish retrieval was made at a location approximately half way between target locations SMB-110 and SMB-111. The Pre-RD feels that this is best case scenario for the location as this site has been attempted four times before.

Target sites planned for tomorrow's fishing activities include SMB-002 (RM 2.25) and SMB-031 (RM 5.8)

Jonni
